

DRIVER ED CERTIFICATE OF COMPLETION

Driver education certificates are no longer released in hard-copy, type-written format. Certificates are generated online by Right Way through the DOT's website. Once all classroom, driving, and fees are completed in full, your permit number and name are entered into the database, and the completion information is submitted to and immediately available at any Iowa DOT. You can then go to any Iowa DOT with your permit. The DOT will pull up your driver education completion through the database via your permit number.

NOTE: For students needing a school permit, school credit, or insurance credit, proof of completion can be obtained through your online account. Login to your account, and on the Student Center page, click View Class History located on the left-hand column. Print this page for proof of completion.

Upon completion of all online classroom and driving hours, the student's Right Way account will reflect completed hours and all email addresses listed on your account will receive an email when the driver education certificate has been released to the DOT. Do not go to the DOT until you receive the certificate release email. If you don't receive the email, the DOT will not be able to pull up your student's certificate.
